

Why Select the Accounting Concentration?

The Bachelor of Business Administration, Accounting Concentration, provides a solid theoretical understanding of the complexities of all aspects of accounting and includes study of other issues such as finance, behavioural management, statistics, economics and an introduction to marketing. An optional internship program has proven to be very successful for students and sponsors.

The program provides for the maximum available transfer credits to all three professional accounting designations (CA, CGA and CMA).

Our accounting faculty all have, as a minimum, a professional accounting designation, and represent a variety of backgrounds including public practice, government and industry. All are very student-oriented, approachable, and passionate about the subjects they teach.

Feedback from our graduates indicates that they have had no problems finding jobs in the field of their choice. The job market remains very strong and is not expected to slow down in the near future.
