WATER EFFICIENCY

SAVING OVER ONE MILLION LITERS OF WATER A YEAR!

Through the use of water efficient washroom and shower fixtures this building saves 1,042,000 LITERS OF WATER per year compared to a similar building of conventional design and construction.

Examples of the water saving fixtures used in this building are:

- Waterless urinals;
- Low flow shower heads;
- Low flow toilets;
- Auto activated water faucets; and
- Temporary irrigation system. After two years the established drought resistant plants will no longer require systematic irrigation.
