

Science & Technology Programs

Forest Resources Technology

- **2-Year Technology Diploma Program**
- **Program Fees: Domestic Students, International Students**
- **Apply for Admission**

VIU also offers a Natural Resource Extension program.

The Program

This program provides the technical training required for starting a career in most fields of forest technology. The program emphasizes the recognition and appreciation of all the major values of the forest including timber, recreation, wildlife, range, fish, water, and visual landscapes. The program is accredited by the Canadian Technology Accreditation Board. Graduates of this program meet the required standard for membership in the Association of B.C. Forest Professionals (ABCFP) as Registered Forest Technologists (RFT).

Twelve courses in the program are currently recognized by the ABCFP and may be credited toward gaining the status of Registered Professional Forester (RPF) in accordance with the Foresters Act of B.C. Credit may be granted towards VIU's Bachelor of Natural Resource Protection, Bachelor of Science, Major in Biology, and Bachelor of Science in Fisheries & Aquaculture programs, as well as forestry degree programs at UBC, UNBC, and University of Alberta.

In the summer, between the first and second year of the program, all students are expected to obtain a forestry-related job to broaden their knowledge of practical forestry. VIU assists students in obtaining forestry employment, both during the summer months and following graduation.

Students may transfer into the second year of VIU's Forestry program either from community colleges in B.C., or from a recognized forest technology school in Canada or the United States. The qualifications of each student requesting such transfer are adjudicated individually. VIU Students also have the opportunity of transferring to other institutions.

Second year students may participate in international field schools and receive VIU credit while studying at designated forestry schools abroad.

Students are required to complete two one-day First Aid courses (O.F.A. Level 1 & Transportation Endorsement) by the end of September of the first year.

Students wishing to obtain an undergraduate degree in Forest Resource Management or Forest Operations from the University of British Columbia (UBC) School of Forestry may, after completing the VIU program ("bridging" year), transfer directly into third year at UBC.

More than \$20,000 of scholarships, awards and bursaries are specifically dedicated to students of the forestry program each year. These monies are in addition to the general financial aid available to forestry students. For more information on scholarships, bursaries and awards, please check with the Financial Aid office or visit the Financial Aid and Awards page.

Career Opportunities

A broad choice of field positions in forestry, environmental management, and natural resource management are available, and graduates have gained employment through private companies, Ministry of Forests, independent consultants or private contractors as timber cruisers, engineers, silviculture contract administrators and planners, as well as other technical jobs such as G.I.S., aerial photography, and computer applications.

Admission Requirements

- General admission requirements apply.
- English 12 with minimum "C" grade, or equivalent.
- A minimum "C" grade in either Principles of Mathematics 11 or Pre-calculus 11; or a minimum "C+" grade in Applications of Mathematics 11 or Foundations of Mathematics 11, or equivalent.
- One science 11 with minimum "C+" grade. (Forestry 11 satisfies this requirement.)

Recommendations for Admission

- Forestry 11 and 12, and Biology 11.
- Physically fit for work in the woods.
- Previous forestry-related employment to assess personal suitability for this career field is an asset.

Notes on Admission

- Applicants lacking the admission requirements are encouraged to meet with an advisor about upgrading options. With written permission, some students may be allowed to register in some first year Forestry courses while upgrading. Please check with an Advisor for details.
- Applicants will be assessed on an individual basis.
- Enrolment in this program is limited. Students who meet or exceed the minimum admission requirements may not necessarily be admitted to the program.

Start Date and Application Deadline

The program starts in September and applications are accepted between November 15 and March 31. For further information regarding late applications and program contacts check the Program Availability List.

Program Outline

YEAR 1	Credits
FRST 111 - (Forest Surveying)	3
FRST 112 - (Forest Inventory)	3
FRST 121 - (Spatial Data)	3
FRST 131 - (Forest Botany)	3
FRST 132 - (Forest Ecology I: Ecosystems & Silvics)	2
FRST 143 - (Forest Hydrology and Riparian Management)	3
FRST 144 - (Forest Resources Administration)	2
FRST 151 - (Forest Soils I)	2
FRST 152 - (Forest Soils II)	2
FRST 162 - (Fire Management)	2
ENGL 115 - (University Writing and Research)	3
ENGL 204 - (Business and Technical Writing) (effective September 2012) or, ENGL 225 - (Business and Technical Writing) (prior to September 2012)	3
MATH 181 - (Introduction to Statistics)	3
Total Credits	34

YEAR 1 - Special Session	Credits
FRST 173 - (Field Skills)	1
Total Credits	1

YEAR 2	Credits
FRST 201 - (Research and Communications)	2
FRST 211 - (Forest Biometrics)	2
FRST 212 - (Silviculture Assessment)	1
FRST 231 - (Silviculture I)	2
FRST 233 - (Silviculture II)	3
FRST 235 - (Forest Ecology II: Ecosystems & Management)	2
FRST 242 - (Integrated Resource Management)	3
FRST 261 - (Forest Harvesting Systems)	2
FRST 262 - (Forest Harvest Planning)	2
FRST 271 - (Forest Road Design)	2
FRST 272 - (Forest Road Planning and Design)	2
FRST 282 - (Information Technology)	1
FRST 291 - (Interior Field Trip)	2
FRST 328 - (GIS for Natural Sciences)	3
FRST 351 - (Forest Pathology)	3
FRST 352 - (Forest Entomology)	3
Total Credits	35

YEAR 2 - Special Session	Credits
FRST 234 - (Ecological Site Diagnosis)	1
Total Credits	1

Note: Some courses may transfer to VIU's Bachelor of Science, Major in Biology degree program, or the Bachelor of Science in Fisheries & Aquaculture degree program. Please check with the departmental Chair.
