Arts, Humanities and Social Sciences Programs

Psychology

Credential:

Bachelor Degree

Options:

Major, Minor

Program Length:

4 Years

The Program

The Psychology Major allows students to become familiar with current work in four main areas of psychology in order to understand the mechanisms believed to underlie thought and behaviour. In addition, this degree provides training in a number of skills related to social research, statistical analysis, and interpersonal relations. This integration of theory and practice is in keeping with the research/practitioner model, which encourages an integration of basic research with applied topics. While the Major does not prepare graduates to practice as psychologists (this requires a Ph.D. and registration with the provincial regulatory organization), it is excellent preparation for work in many related fields, and it is the first step toward further training to obtain professional qualifications.

High school students interested in completing a Major in Psychology are strongly encouraged to take Grade 12 Mathematics and Biology.

Program Outline

Requirements for a Major

Students must fulfill all the Institutional B.A. degree requirements, including Degree English Requirements and courses listed below:

Years 1 and 2	Credits
A minimum combined "C+" average grade in both of: PSYC 111 - (Contemporary Psychology I) <i>and</i> , PSYC 112 - (Contemporary Psychology II)	6
A minimum grade point average of 2.5 and no grade lower than 2.0 ("C") in each of the following: PSYC 204 - (Research Methods) PSYC 205 - (Intro to Biological Psychology) PSYC 210 - (History and Systems of Psychology) <i>Note: It is strongly recommended that these courses be taken in the first two years of a student's program.</i>	9

Years 3 and 4	Credits
Psychology majors will require a combined minimum average of 2.0 ("C") in all upper division Psychology courses.	
PSYC 300A - (Statistical Methods in Psychology I)	3
PSYC 300B - (Statistical Methods in Psychology II)	3
PSYC 400 - (Applied Methods in Psychology)	3
Select up to <i>twenty-four</i> credits of 300-400 level PSYC courses. Note: At least 3 credits must be taken from each of the following four categories:	
1. Biological Psychology PSYC 305 - (Introduction to Biopsychology II) PSYC 315 - (Intro to Neuropsychology I) PSYC 345 - (Drugs and Behaviour - Basic Principles)	
2. Cognitive Psychology PSYC 313 - (Cognitive Psychology) PSYC 318 - (Sensation and Perception) PSYC 326 - (Learning Theory and Behaviour Change)	24
3. Clinical and Health Psychology PSYC 327 - (Health Psychology) PSYC 430 - (Abnormal Psychology) PSYC 432 - (Fundamentals of Clinical Psychology)	
4. Social and Developmental Psychology PSYC 331 - (Social Psychology) PSYC 335 - (Infant and Child Development) PSYC 336 - (Adolescent Development) PSYC 339 - (Adult Development and Aging)	

Requirements outside Psychology

1. Philosophy: 3 credits chosen from PHIL 100, 111, or 112.
2. Social Sciences outside of Psychology: 6 credits chosen from Anthropology, Criminology, Economics, First Nations Studies, Geography, Global Studies, Political Studies, Sociology, or Women's Studies numbered 100 and above.
3. Degree English Requirements with a minimum grade of "C" in each.

Note: Students wishing to go to Graduate School are strongly recommended to have completed eight credits of Biology, Chemistry, or Physics.

Senior Project

A Senior Project of either 3 or 6 credits is recommended for all Psychology Majors intending to enter graduate school after graduation (subject to the availability of a supervisor and/or funds.) The Senior Project, currently completed through PSYC 490 and 491, is not a course, but rather an independent piece of work that may either have an academic or applied focus. It is *the student's responsibility* to contact a departmental member with an idea for the Senior Project. In order to initiate the Senior Project, students must be entering into their final year. The proposal form for a Senior Project must be approved before registration can be completed, and all projects must be approved within two weeks of the beginning of the term in which the Project will be conducted. See the department Chair or the Social Sciences secretary in Building 356 for more information.

Requirements for a Minor

While a Minor in Psychology does not provide students with an adequate coverage of undergraduate courses to continue graduate work in Psychology, it can be very useful in developing ancillary skills and knowledge that highly increase employability and, at

the same time, strengthen understanding of their other studies by providing an alternate perspective.

Students must fulfill all the Institutional B.A. degree requirements, including Degree English Requirements and courses listed below:

Years 1 and 2	Credits
A minimum combined average grade of 2.0 ("C+") in both of: PSYC 111 - (Contemporary Psychology I) <i>and</i> , PSYC 112 - (Contemporary Psychology II)	6
A minimum grade point average of 2.5 and no grade lower than 2.0 ("C") in each of the following: PSYC 204 - (Research Methods) Select at least <i>one</i> of the following courses: PSYC 205 - (Intro to Biological Psychology) PSYC 210 - (History and Systems of Psychology)	6

Note: *It is strongly recommended that these courses be taken in the first two years of a student's program because no more than 12 credits of courses numbered 300 and above may be counted toward a Minor degree before the PSYC 111, 112, 204, and one of 205, or 210 grade requirements are satisfied.*

Years 3 and 4	Credits
A minimum of <i>eighteen</i> credits of Psychology courses numbered 300 and above.	18
