The program includes the following components:

- Engaged learning experiences by examining collaborative research methods and learning through community service.
- Elective courses drawn from a wide-ranging selection of options from different disciplines relevant to leadership and the disability field.

Graduates of the diploma program will gain and/or enhance their skills to work in a broad range of disability sector positions including supervisory/administrative roles and more specialized direct service roles with community agencies, private service providers and some government services.

The Leadership and Disability Studies Diploma is a pathway to numerous 3rd year degree options.
