Arts, Humanities and Social Sciences Programs

Criminology

Location Offered:

Nanaimo

Credential:

Diploma

Program Length:

2 Years

The Program

Criminology is an interdisciplinary science that focuses on law and its interpretation by the courts, patterns in crime, explanations for deviant and criminal behaviour, and society's reaction to law-breaking. The program introduces students to criminal law, the *Canadian Charter of Rights and Freedoms*, and case-law decisions made by the courts. Students examine the three main components of the criminal justice system—police, courts, and corrections. Students explore the trends and correlates of crime, including the influences of age, ethnicity, gender, and social class and how. Major explanations for crime account for these patterns by looking at historical, individual and social causes. The criminological focus is broadened with courses from other disciplines within the Social Sciences and Humanities.

The program provides students with conceptual, critical, and applied skills to work in fields where a legal/justice focus is beneficial. The curriculum emphasizes the development of professional and applied skills including professional ethics, conflict mediation, use of information technology for research, writing, presenting, and working in small groups. Although the core of the curriculum is centred on justice-related issues, students will find the program applies equally to areas in the private sector where research competence, project management, legal analysis, and communication skills are essential.

Students who successfully complete the first two years of the program with a minimum program cumulative grade point average (GPA) of 2.00 may apply to receive a Diploma.
