BC Health Care Assistant (HCA) Programs - Minimum English Language Competency Requirements

To be accepted into a recognized BC HCA program, applicants are required to demonstrate proficiency in English. Students must be able to communicate effectively in English in order to be successful in their studies and to be capable of providing safe and competent care to patients/clients/residents in the work environment. Teamwork and communication failures are a primary cause of patient safety incidents in healthcare; the ability to communicate effectively is one of the fundamental safety competencies identified by the Canadian Patient Safety Institute (CPSI).

All BC HCA program applicants are required to demonstrate English language proficiency. Domestic and/or international applicants who are non-native English speakers will need to take a standardized proficiency assessment to confirm communicative competency in all four language skills areas (speaking, listening, reading and writing).
